Instructor: Dr. Daniel Slilaty

Office: 263 MM

Phone: 775-2572

E-mail: daniel.slilaty@wright.edu

Webpage All class materials, including lecture notes, will be posted on my personal website
www.daniel-slilaty.xyz

No information other than your grades will be posted to Pilot.

Grading Policy The percentage breakdown of your grade is as follows.

five exams 10% for the lowest of the five and 22.5% each for the four highest grades.

Your final score is calculated according to these percentages and your grade is assigned on the following scale

90–100=A

75–89.99=B

60–74.99=C

45–59.99=D

0–44.99=F

Office Hours Office hours will be for a half hour after each class meeting. Monday–Thursday. I expect you to come to my office if you are not understanding the material.

Calculator Usage You should have the use of a scientific calculator in this class. Perhaps you have used graphing calculators in the past, however, I do not recommend them and I avoid their use. Graphing calculators, computers, and mobile phones are prohibited during exams.

Attendance Your attendance at all class meetings is required. There are no excused absences for any reason whatsoever. If you cannot or will not attend the class, then you may not participate in the class. If your attendance is poor, then I will not grade your exams and simply give you an automatic F for the course. If for some serious reason you need to miss a midterm examination, then let me know at least one week in advance and we will try to work something out for you.

Classroom Discussions We will usually start each lecture period with time for problem discussion. You will not really get any help from these discussions unless you come to class having already attempted the previous days' assignments. These discussion assignments are where the questions for the exams will come from.
