Free PDF version at <https://openstax.org/details/books/calculus-volume-3>

**Instructor** Dr. Daniel Slilaty

**E-mail** [daniel.slilaty@wright.edu](mailto:daniel.slilaty@wright.edu)

**Office** 263MM

**Office Hours** MWF 1:30–2:30 and MW 5:00–6:00

**Final Exam** Wednesday December 7th at 5:45–7:45

**Webpage** All course material will be posted on my personal website.

[www.daniel-slilaty.xyz](http://www.daniel-slilaty.xyz)

**Grading Policy** The percentage breakdown of your grade is as follows.

4 Midterms – 20% each

Final Exam – 20%

Your final score is calculated according to these percentages and your grade is assigned on the following scale

90–100=A

75–89.99=B

60–74.99=C

45–59.99=D

0–44.99=F

**Discussion Homework** We will begin each class meet with discussion of assigned homework problems. These problems are those listed on the syllabus plus any extra problems that I may assign. You will not really get any help from these discussions unless you come to class having already attempted the problems. The homework problems are not turned in and not for a grade, but rather are practice for the exams. Problems on the exams will be much like problems from the homework.

**Office Hours** If you need extra help with the material, please do not hesitate to come to my open office hours MWF 1:30–2:30 and MW 5:00–6:00. No appointment is necessary.

**Calculator Usage** You should have the use of a simple non-graphing calculator for this class. Graphing calculators, mobile phones, and computer-based calculation apps are not be allowed during exams.

**Attendance** Your attendance at all class meetings is REQUIRED. If, for some serious reason, you need to miss a midterm examination, let me know at least one week in advance and we will try to work something out.
